

The expertise you rely on

Research, policy and analytic expertise to address the nation's key healthcare issues

Highlights

Who we serve

Center for Medicaid and Medicare Services (CMS)

Agency for Health Research and Quality (AHRQ)

Substance Abuse and Mental Health Service Administration (SAMHSA)

Department of Defense (DoD)

Office of Personnel Management (OPM)

Centers for Disease Control and Prevention (CDC)

Office of the Assistant Secretary for Planning and Evaluation (ASPE)

Veterans Administration

Truven Health Analytics® was acquired by IBM in 2016 to help form a new business, Watson Health™. Watson Health aspires to improve lives and give hope by delivering innovation to address the world's most pressing health challenges through data and cognitive insights.

Through collaboration across federal and state government, the health and human services expertise and solutions from Truven Health Analytics®, part of the IBM Watson Health™ business, support your efforts to make a meaningful impact on people's lives and strengthen communities. We work to help government agencies develop cost-effective health and human service programs tailored to their communities' unique needs.

At the same time, we offer governments the ability to implement programs rapidly with scalable operations and automated systems.

Projects include:

- AHRQ: Healthcare Cost and Utilization Project (HCUP)
- CMS: Zone Program Integrity Contractor (ZPIC) Zone 4
- CMS: Testing Experience and Functional Assessment Tools - Technical Assistance
- CMS: MEDICAID Innovation Accelerator Program (IAP) Learning Collaboration and Program Support
- SAMHSA: National Spending Estimates Project for Mental Health and Substance Abuse Treatment

What you get with Truven Health Analytics

A Singular Focus on Healthcare Performance—We believe information is valuable only when it leads to positive impacts on healthcare cost, quality and access. Few companies have as much experience in healthcare quality improvement and accountability.

- Three decades of experience in large and complex policy, research, analytical, technology and technical assistance projects for CMS and HHS operating divisions
- Expertise harmonizing disparate datasets and translating data into actionable information
- Expertise across all markets with various national quality organizations, state agencies, research institutions and stakeholders, including public and private health providers and consumer representatives
- Innovative quality measure development in the United States and abroad
- Experience in quality control across complex workstreams
- Independent, unbiased analytic research for health quality, outcomes, cost and overall measures development and implementation
- Quality Improvement Organization-like (QIO-like) entity¹

Truven Health combines world class healthcare cost and quality analytics with Lean Enterprise transformation to help drive healthcare performance improvement.

Expertise across markets

Our solutions and services are utilized in all major segments of the healthcare market.

- **Federal government:** We help our federal clients control their costs; improve quality and combat program fraud, waste and abuse. We have a proven track record of providing thought leadership, innovation and healthcare decision support to the federal government.
- **State Medicaid and CHIP agencies:** We have direct engagements with nearly two-thirds of state Medicaid or Children’s Health Insurance Program (CHIP) agencies to provide decision support systems; data warehousing services; reporting and analytics; fraud, waste and abuse detection services and research and public policy consultation. We have served the state Medicaid/CHIP community for over 20 years.
- **125 private health plans:** We have provided decision support systems and data warehouses to the health plan industry for 20 years.
- **400+ large employers:** We have provided decision support databases and analytic solutions for employee health benefit management for 40 years. Our clients include approximately 120 Fortune 500 companies and 13 state employers.
- **4,000+ hospitals and healthcare systems:** For more than 20 years, the 100 Top Hospitals® program has guided us in helping hospital organizations improve quality, service, and operations
- **Major pharmaceutical companies:** We perform outcomes research and analysis for top pharmaceutical companies and provide data-mining solutions that cover the competitor intelligence needs of pharmaceutical innovators—the latest drugs, compounds, genetic sequences and targets, clinical trials and licensing opportunities, patents, journals, conferences, academic articles and more.

- **Health Information Exchange (HIE):** We have launched, adapted and sustained a service-oriented, standards-based, flexible, HIE platform for state, community and provider clients. Our solutions optimize the potential for cost-effective utilization of existing building blocks, establishing a scalable technology platform, maximizing provider adoption, improving clinical outcomes and harnessing the potential for sustainability through annual subscriptions and clinical decision support and reporting applications.

Our multi-market presence is important to our customers because it enables us to apply our expertise in one market to bring value to customers in other market segments.

Statement of Good Security Practices: IT system security involves protecting systems and information through prevention, detection and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, misappropriated or misused or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service or security measure can be completely effective in preventing improper use or access. IBM systems, products and services are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective. IBM does not warrant that any systems, product or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
